

# Zaryab Muhammad Akram

+92 (312) 152-6960 | zaryabmakram@gmail.com | linkedin.com/in/zaryabmakram | github.com/zaryabmakram

## EDUCATION

---

### National University of Sciences and Technology (NUST)

Islamabad, Pakistan

*Bachelors of Science in Computer Science, CGPA: 3.95/4.0 (99%)*

2017 – 2021

**President's Gold Medal — Class Rank: 1/125**

## EXPERIENCE

---

### Machine Learning Engineer

Jun. 2022 – Present

*Epic Games*

*Islamabad, Pakistan*

- Trained and fine-tuned state-of-the-art inpainting models, including LaMa and Stable Diffusion, for texture repair
- Developed segmentation models for precise texture identification and segmentation within 2D and 3D assets
- Created end-to-end training and evaluation pipeline for machine learning models on AWS SageMaker
- Automated scalable deployment workflows leveraging AWS Cloud Development Kit (CDK)

### Product Engineer

Jul. 2021 – May 2022

*AMK Technologies*

*Ohio, US (Remote)*

- Improved customer traffic by 20% through designing a real-time provider search feature
- Built a high-performance patient registration workflow enhancing the preexisting structure
- Supported product deployment by optimizing container sizes of microservices

### Artificial Intelligence Engineer

Oct. 2021 – Dec. 2021

*Digital Product School, UnternehmerTUM*

*Munich, Germany (Remote)*

- Automated processing of the event-log data from factory floors through process mining
- Detected and visualized cycles in workers' trajectories through process graphs
- Validated the application through user-tests and deployed it in an agile approach

### Undergraduate Research Assistant

Sept. 2019 – Jun. 2021

*TUKL-NUST Research & Development Center*

*Islamabad, Pakistan*

- Contributed to multiple deep learning research projects under the supervision of [Dr. Faisal Shafait](#)
- Used Deep Neural Networks to update the level-set forcing term of classical segmentation algorithms
- Applied Case-Based Reasoning (CBR) to retrieve similar cases from Court Room records

### Teaching Assistant, Data Structures & Algorithms

Oct. 2020 – Jan. 2021

*School of Electrical Engineering and Computer Science, NUST*

*Islamabad, Pakistan*

- Assisted [Dr. Muhammad Shahzad](#) with **Data Structures and Algorithms** course
- Designed and graded quiz problems and homework assignments
- Held weekly office hours to help students with their issues and queries

### Machine Learning Intern

Jun. 2019 – Aug. 2019

*VisionX Technologies*

*Islamabad, Pakistan*

- Designed and tested information extraction system for courier package label images
- Implemented Named Entity Recognition on extracted text using a CNN-BiLSTM-CRF model
- Explored Object Detection and Segmentation algorithms including Faster R-CNN and Mask R-CNN

### Web Developer

Jul. 2018 — Sep. 2018

*Nausal Technologies*

*Islamabad, Pakistan*

- Translated Photoshop designs into responsive webpages

## AWARDS

---

- **President's Gold Medal** for securing First Position in the Class of 2021
- **Dean's High Achiever Award** (School of Electrical Engineering and Computer Science)
- **Merit Scholarship** for all undergraduate semesters

## CERTIFICATIONS

---

Eastern European Machine Learning Summer School (EEML) 	<i>Krakow, Poland (Virtual)</i>
Machine Learning Foundations (AWS Scholarship) 	<i>Udacity</i>
Deep Learning Specialization (deeplearning.ai) 	<i>Coursera</i>
Tensorflow in Practice Specialization 	<i>Coursera</i>

## PROJECTS

---

### **Discerning Deepfake Videos (Undergraduate Project)** | *TensorFlow, Keras, MTCNN, Dlib*

- Designed a lightweight Recurrent Convolutional Network to efficiently extract low-level spatio-temporal features
- Achieved state-of-the-art results on public benchmark DeepFake datasets (e.g. CelebDF, FaceForensics++)

### **Image Noise Reduction with Auto-encoders** | *TensorFlow, Keras, Matplotlib*

- Improved classification accuracy on noisy and corrupted MNIST images
- Enhanced noisy input with a Convolutional Auto-encoder

### **Document Localization in Natural Images** | *TensorFlow, Keras, Pandas*

- Localized documents in natural images using Deep Convolutional Neural Networks
- Achieved state-of-the-art results on ICDAR 2015 SmartDoc Competition 1 dataset

### **Search Engine** | *Python, BeautifulSoup, Flask*

- Designed a scalable hypertextual Web Search Engine on the Simple Wikipedia Data Dump
- Implemented a custom search index and Web Crawler
- Developed a full-stack web application using Flask

### **File Management System** | *Python, Multiprocessing, Synchronization*

- Developed a multi-user friendly File Management System based on Client-Server architecture
- Solved Reader-Writer Problem through process synchronization

## TECHNICAL SKILLS

---

**Languages:** Python, C/C++, Java, MATLAB, SQL, basic proficiency with Assembly

**Machine Learning Frameworks:** TensorFlow, Keras, PyTorch, NumPy, Matplotlib, Pandas, OpenCV

**Web Frameworks:** HTML, CSS, Bootstrap, JavaScript/ TypeScript, jQuery, PHP, React, NodeJS

**AWS Services:** SageMaker, Cloud Development Kit (CDK)

## EXTRACURRICULAR ACTIVITIES

---

- Competitive table tennis player, participating in tournaments both individually and as a team member
- Organized *Project Insaniyat* community service initiative to provide education to local out-of-school children
- Active participant in *SEECs Plantation Drive* to promote green initiatives across the university campus
